

# Complete Cloud Competence

Evolve how you operate,  
transform how you innovate

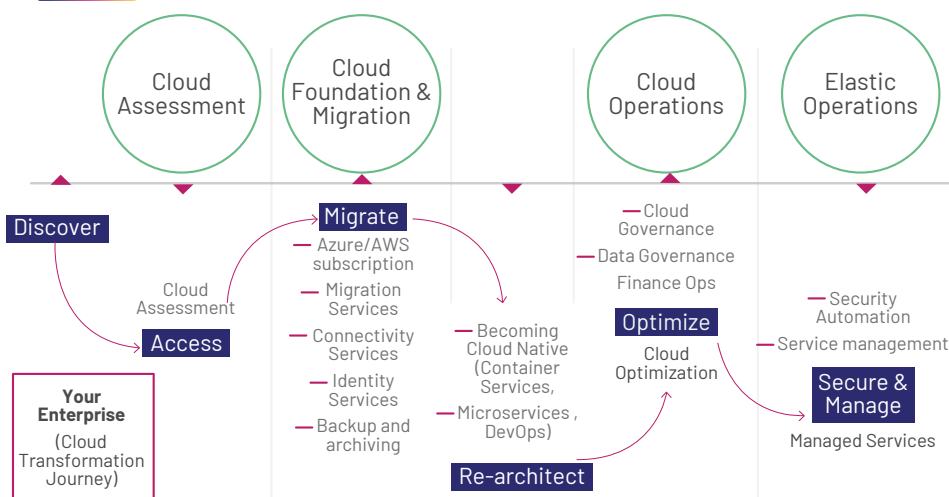

In today's dynamic business environment, organizations need to stay agile and responsive to stay competitive. Cloud computing can be a complex process that requires careful planning, testing, and execution. Moving legacy or on-premises applications to the cloud can be done in different ways, including a lift-and-shift approach where applications are simply moved to the cloud without any modifications or a re-architecting approach where applications are redesigned to take advantage of cloud-native features.

The cloud approach is becoming increasingly important for organizations as they seek to modernize their IT infrastructure and take advantage of the benefits of cloud computing, such as improved scalability, agility, flexibility, and cost savings, as well as access to advanced analytics, artificial intelligence, and machine learning services.

Korcomptenz assists enterprises in their cloud journey, with a comprehensive range of cloud solutions across multiple business processes & operations.

## Typical Cloud Transition

## Why Cloud is Popular?

### Better Insights and getting faster to Market

Enterprises need to not just innovate but understand and respond to customer needs and product/service opportunities faster

### Improve Collaboration

Impart mobility to teams to enable participation in business processes from any device/location

### Automate DevOps

Ability to rapidly envision, design, develop, and test new applications

### Scalability and Flexibility, while being cost effective

Quickly and easily increase or decrease compute requirements

### Business Modelling

Create a digital representation of real-world IT environment, applications, and business processes, known as a digital twin

### Bulletproof security

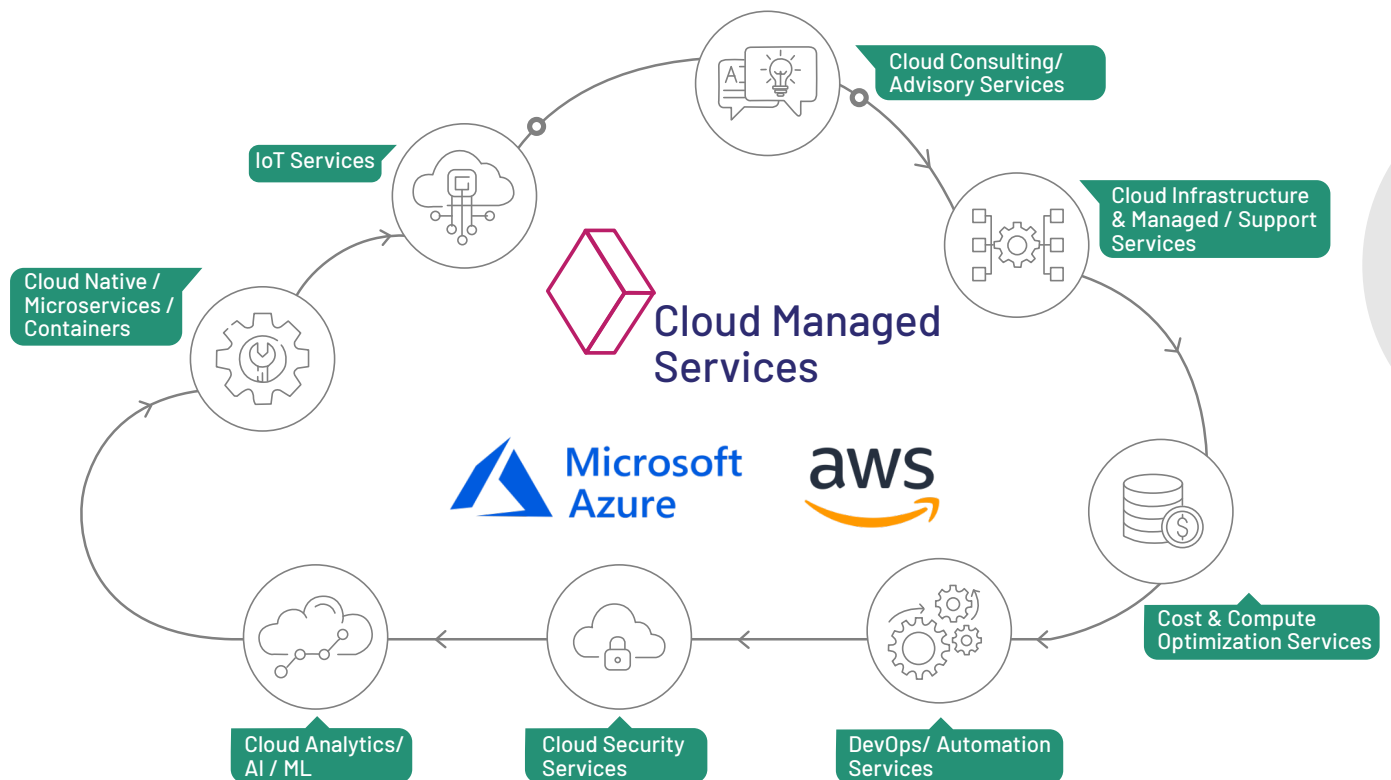

Zero trust and compliance strategy

### Accelerate Cloud Migration

Application modernization in a hybrid cloud environment.

## How KOR adds value to the business

As an Azure and AWS partner, we enable businesses speed and scale by simplifying processes, freeing up resources while empowering them to attain a multi-layered grasp of your day-to-day operations and turning your IT cost-center into a powerful tool to accelerate business model change, optimize ROI, and lower TCO.

## Our Cloud Value Proposition: Making your Enterprise Agile

### Integrated services

- > Application & Infrastructure Managed Services
- > Security Management
- > Cloud Management Services

### Efficiencies

- > Standardized processes for assured services
- > Korcomptenz IP, Tools & Platforms
- > Continuous improvements & Cost optimizations

### Flexible Pricing Models

- > Multiple engagement models
- > Opex models
- > Variability linked to Business growth
- > Infrastructure as a utility

### Business Visibility

- > Move from SLAs to BLAs
- > Service prioritization based in business needs
- > Verticalized Solutions

### Transformation

- > SaaSification, Cloud enablement
- > Application portfolio rationalization
- > Technology refresh
- > Process transformation
