Korcomptenz Microsoft Dynamics Business Central and Dynamics NAV provides ERP and CRM services needed to strategically manage your growing business while maximizing your operation excellence. We have an extensive experience improving business outcomes for our customers, by leveraging end-to-end solutions involving the ongoing convergence of ERP, CRM, Azure Cloud, Analytics, Artificial Intelligence and IoT.

## QUALITY CONTROL MANAGEMENT

Quality control is a process that is used to ensure the quality standards of the product is maintained. Product Quality is a vital factor for acquiring a large customer base. The basic goal of this process is to ensure that the products provided meets specific requirements and characteristics, such as being dependable, satisfactory, safe and fiscally sound. This add-on can be implemented in Microsoft Dynamics NAV (2016/ 2017/ 2018) and Microsoft Dynamics 365 Business Central.

Quality Control gives manufacturers, distributors, and other companies a consistent and an efficient way to access and record quality metrics in their operations and drive processes with quality improvements giving the end-users, best-in-class experience.

## HOW QUALITY MANAGEMENT HELPS

Quality modules helps departments like production, procurement, inventory and warehouses of a business to keep a track of its quality levels in various stages.

Quality Check can be defined for specific items with 'n' number of inspection specifications.

System will automatically validate the inbound item's quality based on the defined parameters and move the items to the respective locations.

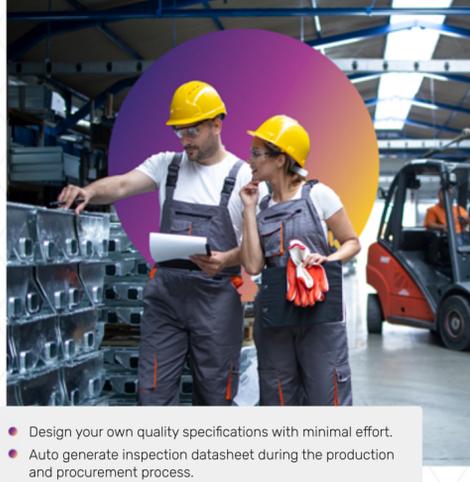

Quality Management also has the provision to generate the purchase return orders automatically, if the defective items has to be returned back to the vendor.

## WHO CAN USE IT?

Quality Management can be used by any manufacturing and other product trading companies who are already using Microsoft Dynamics NAV (2016/ 2017/ 2018) and Microsoft Dynamics 365 Business Central. This add-on can be implemented to the running system with minimal effort.

"This Add-on helps you to improve customer experience and helps to sell good products with the fullest satisfaction of customers with quality sales. It is tightly integrated to Microsoft Dynamics NAV and Microsoft Dynamics 365 Business Central and automatically generates inspection data sheet during inbound transactions.

Help end customers in making well-informed decisions while bringing significant value to their company. Customers will feel empowered and have a sense of ownership as we ensure that they obtain the appropriate quality-verified materials. Building upon these positive experiences will encourage customer and brand loyalty.

- Design your own quality specifications with minimal effort.
- Auto generate inspection datasheet during the production and procurement process.
- Manage inventory based on the quality testing.
