KOR BankIQ: AI-Assisted Retail Banking Solution with Microsoft Fabric

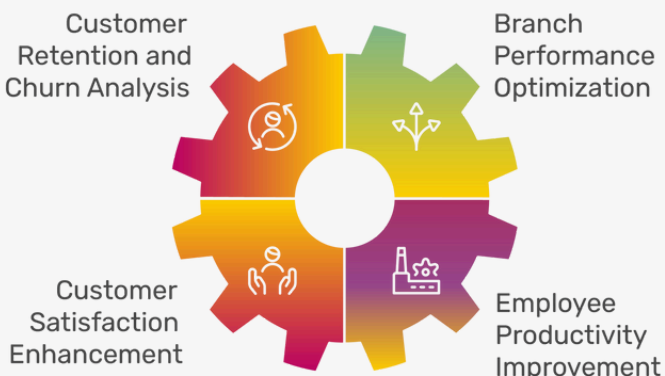

Make every customer your biggest fan!

AI-Driven Insights for Smarter Retail Banking

Banks are up against major challenges—struggling branches, rising churn, and inconsistent service. These obstacles cut into profits and shake customer loyalty. Our AI-powered solution turns data into action, optimizing operations, driving efficiency, and transforming the banking experience.

Smarter Insights, Stronger Banking: AI-Powered Analytics with Microsoft Fabric and Power BI Copilot

Overview of BankIQ

AI-Assisted Insights and Advanced Reporting

- Business users create advanced reports using simple English prompts.
- AI Copilot with Microsoft Power BI identifies patterns, trends, and correlations across data.

Automated Data Management

- **Data Cleansing and Transformation:** Ensures accuracy and consistency while reducing manual effort.
- **Faster Analytics:** Automated processes speed up data preparation and insight generation.

Enhanced Data Governance

- **Security and Compliance:** Built-in security features and access controls ensure regulatory compliance.
- **Data Cataloging and Metadata Management:** Facilitates better governance and understanding of data.

Seamless Data Connectivity

- **Unified Data Sources:** Integrates data from core banking, ERP, CRM, databases, and cloud services.
- **Wide Data Connector Support:** Enables easy access to diverse data sets for in-depth analytics.

Scalable & Flexible Platform

- **Adaptable to Business Needs:** Scalable infrastructure accommodates growing data volumes.
- **Microsoft Fabric Integration:** Flexible MS Fabric architecture that integrates with existing IT infrastructure and AI technologies.

Key Business Outcomes

- With AI Copilot, you can generate insights **60%** faster without IT involvement.
- **50%** improvement in employee productivity, customer satisfaction, and sustainable branch profitability.

Our Data Analytics and AI Practice

- Microsoft Fabric Implementation
- Power BI with Microsoft Fabric
- Synapse Migration to Fabric
- BI Modernization with Fabric
- Microsoft Fabric FinOps Services
- Microsoft Fabric Copilot Integration

Why Choose Korcomptenz?

Korcomptenz specializes in AI-driven analytics and data solutions, helping businesses unlock insights and drive efficiency. As a Microsoft Partner for AI Cloud, Microsoft Fabric, and Azure Analytics, we leverage:

- Generative AI and Agentic AI
- Microsoft Fabric Copilots
- Advanced Data Visualization

Our expertise spans Manufacturing, BFSI, Retail, CPG, Healthcare, and Pharma, with deep capabilities in finance, customer analytics, supply chain optimization, and ESG reporting. By integrating Microsoft Fabric, we enable seamless data unification, intelligent automation, and enhanced decision-making—empowering organizations to build scalable, AI-powered analytics strategies for sustainable growth.

Recognized as a Contender in the ISG Quadrant 2025 for AI Services on Microsoft Cloud and Azure Data Fabric
