# How Can Salesforce Lightning Apps and the Lightning Platform Help Transform My Business?

While the possibilities are endless, limited only by your imagination, here are a few sample scenarios to help get you started.

- Streamline human resources by replacing paper forms and PDFs with online versions
- Improve project management and budget tracking with easy-to-use tools
- Route and approve invoices without relying on email or offline processes
- Engage customers in new ways by offering them access to secure, personalized dashboards and powerful self-service tools
- Digitize time tracking and reporting
- Onboard customers from initial application to credit checks entirely online

## How Do I Know If I Need A Lightning App?

Salesforce Lightning Apps are almost infinitely customizable and can support an extremely wide range of functionality based on your unique needs, but there are a few key use cases to consider as you plan for your first apps.

Are you processing anything in your organization the old-fashioned way, on paper?

Are you relying on email to receive and process requests internally and from customers?

Are you onboarding employees and performing appraisals manually?

Are you approving expenses manually or using a spreadsheet?

Are you struggling to manage access to conference rooms or other shared spaces?

Are you receiving orders via email?

Are you relying on email groups to broadcast key information like crisis communications?

Is your current Salesforce installation or ERP software missing a few steps in the process?
