Move and Modernize your Microsoft workloads with Azure

Korcomptenz | **Microsoft**

Consider the challenges when moving workloads to the cloud

Cost of Moving	Planning for migration	Go-to for support	Undertaking transformation
Are there affordable options that make sense for our needs?	Are we ready for the move or will our workloads break down?	Are there different sources for different problems?	What technologies can I depend on when executing our cloud strategy?

Choose Azure and stay with the technology leader you trust

Unparalleled cost savings

Cut back infrastructure expenses associated with traditional on-premises

Assessment and TCO analysis tool to understand your next steps.

Easily plan migrations

Enable rapid replication of your virtual machines with no downtime or interruption.

Ongoing cost optimization reports ensure you're meeting the needs.

**First class, first party support**

Support from one place, whether specific to workload or the all-up platform.

Available 24x7 and multilingual

Modernize your apps beyond infrastructure

Flexibility, high compatibility and hybrid capabilities

Secure and familiar platform which allows you to get the most out of your current investments

Intro

Take advantage of your current investments and IT skills in Microsoft technologies. Microsoft applications and Azure have been built to work better together with flexibility, high compatibility and hybrid capabilities. Run Windows Server, SQL Server, SharePoint, Dynamics and other Microsoft server software in Azure. Enjoy unparalleled cost savings, easily plan migrations, avoid complexity of multi-vendor support, and modernize your applications in the cloud from the leader you already trust.

Korcomptenz | **Microsoft**

Windows Server

Move to the cloud faster, achieve more, and save money with a growing collection of integrated services. It can provide you an end-to-end cloud-based infrastructure services (compute, database, storage, web, analytics, network, and mobile, among others) that make it easy to run business-critical enterprise applications in the cloud in a reliable way.

Evolve existing infrastructure
Move workloads between on-premises and cloud without worrying about downtime

Application Innovation
Deliver faster time to value with agile apps and microservices

Save money with your move
save up to 40 percent on Windows Server virtual machines in Azure

Dynamics

Dynamics 365 was specifically developed to help customers simplify and streamline their migrations to the cloud in order to achieve fast time to value with predefined and automated deployments.

Deploy when and where you need
Leverage hybrid deployments to better align with what your organization needs

Retain complete control over your data
Choose who accesses your data, while taking advantage of one of the most trusted clouds on the planet.

A lower the cost of doing business
Free up IT resources by taking advantage of Azure's built-in capabilities

SQL Server

Make smarter decisions, redesign business processes faster, and fuel business growth using the cloud-based data platform solution built for, and on, Azure—bringing together business intelligence, AI, infrastructure, compute, and database services.

Made for hybrid cloud
Your on-premises application can access data in Azure SQL Database. Achieve bottomless capacity, continuous availability, and lower storage costs

Built for Azure
SQL Server offers users easier workload mobility between data centers, private clouds, and Microsoft Azure.

At a reasonable cost
Get breakthrough in-memory performance across all workloads—all in one package at a low cost.

Sharepoint

Azure provides unified cloud platform with greater choices and flexibility for SharePoint deployment and tight integration. Harness the advantages of Azure, be it reducing the time to deploy complex SharePoint farms from days to minutes or scaling SharePoint infrastructure on Azure on-demand to meet ever growing business requirements.

Move faster with the cloud
Boost a SharePoint deployment from days to hours with ready-to-deploy images

Integrated Cloud Platform for SharePoint
Enhance SharePoint capabilities by integrating with Azure services

Save on infrastructure and support cost
Be more cost effective, and use resources that you need

Your Migration

Migrate to Azure at your own pace with confidence and support from Microsoft.

Ensure a 360-degree approach to migration—not just the VM; apps drive migration, and all apps have app services, data, and storage elements

Integrated first-party migration tools to enable easy lift/shift of applications, data, and virtual machines to Microsoft Azure

Reward offers for greater ROI and lower TCO

Continual monitoring and powerful performance analysis, as well as post-migration optimization for data health and performance

Strong ecosystem of ISV and SI partners to expand discovery and migration tool offerings; reduce time to migrate through strong migration practices
