Data, Analytics and AI

Data and Insights have the power to Transform. AI is now mission-critical. You can activate your AI Journey and Scale your Data Play – Now!
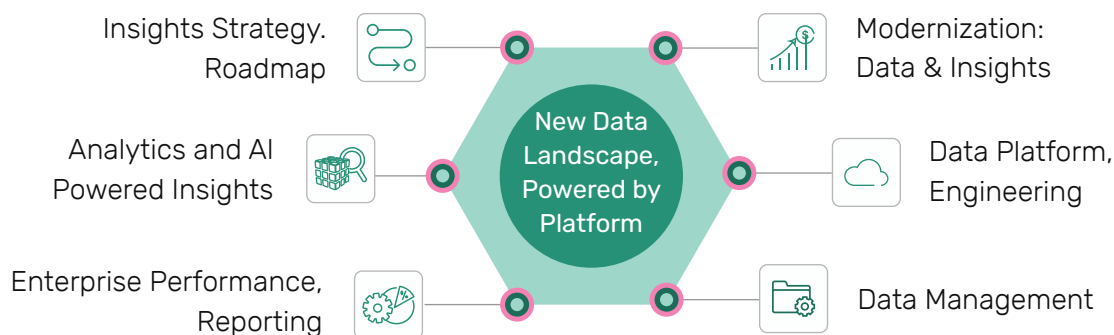

Introduction

In the recent past, we have seen multiple Industries completely transformed across the value chain. Speed of change is a top challenge for Enterprises. Data is a core pillar helping companies understand and comprehend the change. We are in the Era of Artificial Intelligence and to maximize value, data needs to be "activated" through the power of AI. Machine intelligence and continuous learning are key to higher-value predictive and prescriptive capabilities which are becoming table stakes in most Industries.

"Insights Driven Transformation" is our end to end offering to accelerate your transformation and help you leapfrog competition by augmenting human values with Machine Intelligence for superior outcomes.

Insights Driven Transformation – at the Core, By KOR!

Our Proven Offerings for Insights driven Transformation!

Insights Strategy. Roadmap

Modernization: Data & Insights

Analytics and AI Powered Insights

New Data Landscape, Powered by Platform

Data Platform, Engineering

Enterprise Performance, Reporting

Data Management

Strategy and Roadmap to Modernize: AI is mission-critical for CXOs, be it for business continuity or speedy growth. We'll partner with you to customize a Transformation Roadmap for insights-focused change.
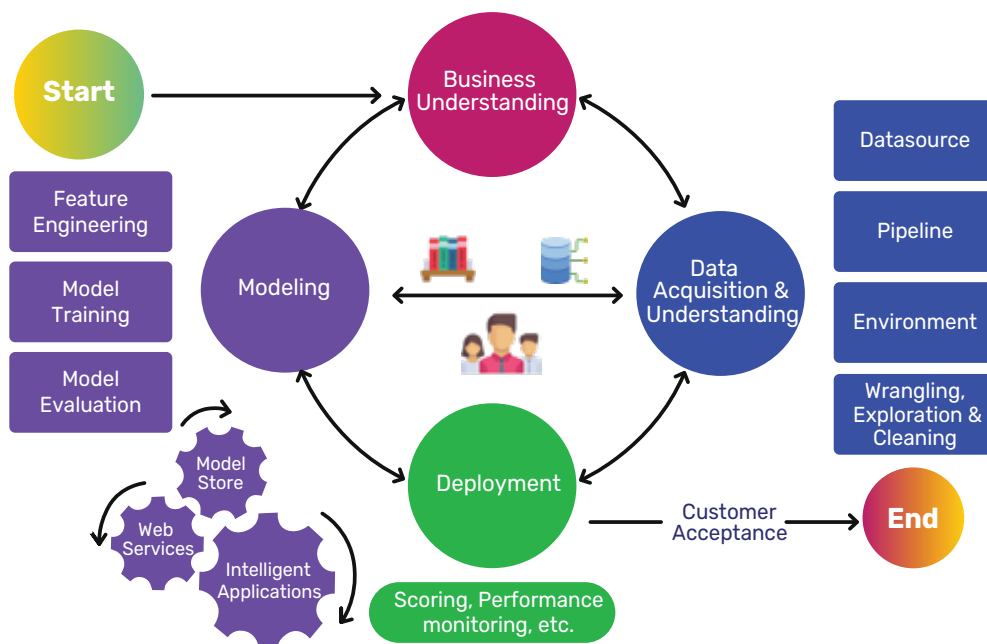

"All" Data Platform and Management: A robust data foundation, underpinned by data strategy and data management is a key to driving AI Adoption and value from Data. We take a "Platform" centric approach to help you with this ever-expanding "data" - "All" spanning structured, semi-structured, and unstructured.

Dashboards, Reports, and Analytics: Through a "business" focused approach, coupled with leveraging the latest technology, we deliver impactful Performance Reporting and Predictive Analytics capability to power the enterprise – be it leadership scorecards, departmental dashboards, or Reports.

Responsible AI for Deep Insights: Our AI offering to help you reap the benefits of the transformative power of deep learning, be it computer vision, natural language, speech, or other cognitive abilities. We enable use cases with a "human"-centric approach and deliver "Responsible" AI.

Methodology

Our unique KorOps workflow for analytics is designed with a #FocusOnInnovation

Technology Stack

From a technology perspective, Data and Insights are a crowded segment. We help our clients implement the "Best of the Breed" solution or "Solution focused on a Technology Platform (end to end like Azure/AWS Cloud platforms). A few Best of breed examples – Snowflake, Tableau, Informatica, Talend, TensorFlow, Pytorch, R, and Python.

Industries

We have helped clients across sectors transform. A few example sectors are:

◇ Retail (example: QSR, Fashion)
◇ Manufacturing (example: Automotive, Process etc.)
◇ Energy (example: Oil field services, Oil & Gas)
◇ Financial Services (example: Banking, Insurance)
◇ Distribution

Getting Started - Avail our Complementary Assessment

Assessment: As a starting point, we typically work closely with our clients (Business and IT) to craft a rapid transformation using a structured assessment. Our approach is to share experience and work collaboratively on priority areas.

Duration : 1.5 to 2 months of assessment

Deliverables:

Tailored Transformation Roadmap or high-level plan to kickstart the journey.

Why Korcomptenz?
