Supply Chain Optimization

Respond to Your Evolving Business Needs with Smart Supply Chain Optimization

Introduction

Delivery volumes have never been higher, and supply chains are feeling the strain. Packages are getting delayed, shipping carriers have raised prices, and businesses – whether suppliers, wholesalers, or retailers – all feel the burden on their end of the supply chain process. To meet the new demand, companies will have to adjust their operations for greater efficiency, flexibility, and cost reduction. Supply chain optimization ensures a smoother process and a more successful business model focusing on efficiency and profit.

A supply chain encompasses all steps in transferring products from the manufacturer to the end customer. Optimizing this process allows it to function at peak efficiency.

Business Benefits

Our supply chain optimization service benefits your business in the following ways:

- Enhanced visibility
- Better understanding of customer needs
- Agility and flexibility
- Higher ROI
- Reduced redudancy in supplier funtions
- Optimization of resources
- Less risk and improved compliance

Supply Chain Optimization Journey

The supply chain optimization journey spans over 3 phases from design, planning & execution and is generally a top-down process. Every phase performed by different levels of the organization must have customer centricity at its core.

Supply Chain Design	Supply Chain Planning	Supply Chain Operations / Execution

Throughout the supply chain process, areas and opportunities to digitize must be highlighted. Digitizing and automating supply chain management using a dedicated technology solution can increase inventory visibility, foster vendor partnerships and optimize customer delivery experiences.

How the CEO Needs to Change

01 Start at the Top

How the Company Needs to Change

02 Treat your suppliers as friends	**03** Empower your "Shoppers"	**04** Go Bionic

How the Company's Ecosystem Needs to Change

05 Cut Costs-Fast	**06** Dream Big Together	**07** Settle for Perfection
08 Share your Tomorrows	**09** Get Quicker, Faster-as One	**10** Anticipate the Inevitable

Realized Business Outcomes

Supply chain optimization can have an impact on any or all of these areas.

Supply Chain Optimization - 6 Major ImprovementAreas

- Inventory Control
- Demand Planning
- Decision - Making
- Customer Service
- Order Fulfilment
- Inventory Visibility

Supply Chain Optimization and Inventory Visibility Assessment

The Supply Chain Management Optimization and Inventory Visibility Assessment will cover:

- Evaluation of your supply chain according to the five pillars of supply chain management.
- Understanding how inventory is tracked and your current challenges in inventory tracking.
- Analysis of your supply chain against overall strategy (for example, new channels of business, new acquisitions, etc.)
- Discover the gaps in business processes and the scope of optimization and automation.
- Evaluation of the planning process and potential enhancements in planning accuracy.

Deliverables:

- A strategy for a single view of inventory.
- An approach to onboard an intelligent planning system to drive positive and measurable outcomes across the supply chain.
- Recommendations on new technology adoption.

Value Proposition

We help you build an integrated, organized supply chain structure to improve communication and relationships between every partner in the supply chain system. The rapid accessibility and shareability of sophisticated data and reporting powers visibility and clarity, and therefore, SCMs will have a better capability to:

- Identify inconsistencies and barriers in the SC process
- Quick and robust processing of supply-transportation data
- Instantly process and alter product orders and invoices
- Provide updates to inventory and warehouse reporting data
- Optimize supply chain adoption and utilization from your existing ERP

Technology Stack

From a technology perspective, supply chain optimization is a crowded segment. We help our clients implement the "Best of the Breed" solution or "Solution" focused on technology platforms like Dynamics 365 Supply Chain Management and Porini.

Industries

We have helped clients across sectors transform. A few example sectors are:

- ✓ FMCG
- ✓ Automobile
- ✓ Consumer durables
- ✓ Retail
- ✓ eCommerce

Why Korcomptenz?

Korcomptenz uses the Microsoft recommended "Success by Design" frame-work, overlays the collective consulting & implementation expertise to better architect, build, test and deploy sustainable solutions.

Success by design focuses on early detection, providing proactive guidance to ensure predictable success. This is all possible using Workshops as "Inspection points" at different stages of the project to review findings, recommendations and highlight potential risks. **Request a demo or free consultation today.**
