Are You Ready to Leverage the Disruptive Potential of AI?

Take our AI-Readiness Assessment to discover how to become an AI-first enterprise.

In today's competitive business landscape, the adoption of AI into your business is not just an advantage - it's a necessity. However, for numerous businesses the lack of quality and availability of data when required at the point of decision making has become the biggest impediment in their readiness to becoming an AI-First enterprise. This oversight represents more than a missed opportunity; it's a failure to unlock the wealth of insights and opportunities concealed within existing enterprise data reservoirs. Realizing value from data transcends mere collection; it necessitates the crafting of a robust and modern AI-First strategy finely tuned to the organization's objectives and vision. Integrating an AI readiness assessment into the process of arriving at this strategy ensures businesses are prepared to leverage AI's transformative potential effectively.

Globally, many organizations are still unprepared to realize AI's full potential, with little improvement year over year.

98% have felt a greater sense of urgency over the past year.

50% of organizations, CEOs and leadership are driving the urgency for AI.

85% say they have less than 18 months to implement an AI strategy before facing negative business impacts.

50% of companies have already allocated 10-30% of their IT budget to AI.

Why AI Readiness Matters

AI's transformative potential for driving innovation, optimizing operations, and enhancing customer experiences is well understood by leading enterprises.

- Increased decision-making agility
- Enhanced User Experiences
- Improved Operational Efficiency
- Scalable Modern Foundations

Why You Need the Right AI Strategy to Maximize Your ROI on AI Investments

Here are some key use cases that are delivering immediate business value for AI-ready enterprises:

Customer 360

> AI-driven customer segmentation, Predicting Customer Churn & Retention actions, Increase customer wallet share, lifetime value, Cross-sell, Up-sell

Supply, Demand Forecasting & Planning

> Gen AI models analyze historical sales, inventory, supply and production data. Generate demand forecasts to optimize supply chain operations.

Sales Insights Generation

> Provide natural language summaries of sales performance using AI-powered narratives and provide recommendations for sales actions.

Intelligent Document Processing

> Automate extraction, classification, and summarization of purchase orders, invoices, and other documents & identify Next Best actions

AI Assistance & Knowledge Sharing

> AI-driven chatbots to assist employees with answers about processes, or other operational queries.

> Gen AI models trained on internal knowledge base for employee training, KT & shop floor assistance.
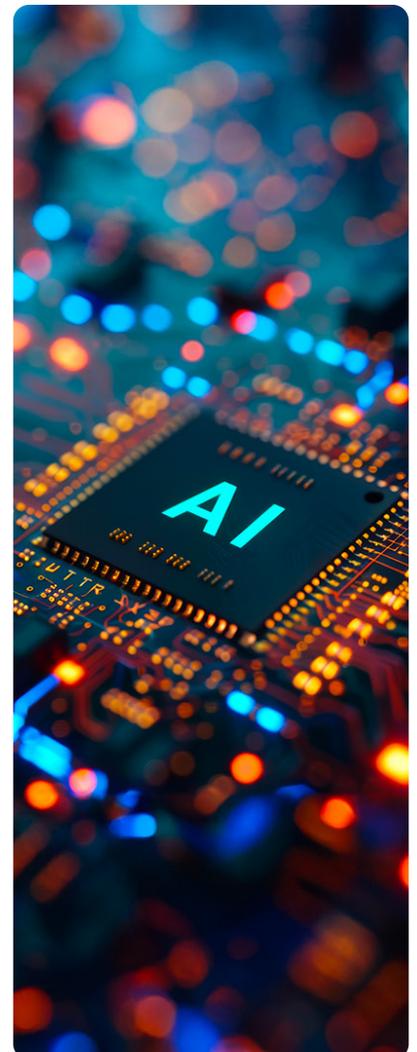

Benefits of AI Realized Across Industries

Predictive Maintenance for one of the largest refrigerated storage specialists. Real-time AI application predicts hours to failure of refrigeration system components based on IOT data ensuring timely preventive maintenance & reducing significant commercial losses of perishable goods

Customer Churn Prediction for a leading Regional Bank identifies customers with a propensity to churn and recommend retention actions across the customer journey driving increased customer wallet share, lifetime value, Cross-sell, Up-sell

Conversational AI assistant for a large insurance wholesaler act as a chatbot integrated with various internal and external data sources helping their client facing teams increase efficiency of client onboarding process resulting in increased customer satisfaction.

Building Blocks of an AI-First Enterprise

Think like an entrepreneur

Adopt Scalable Ecosystems

Embrace the Human Element

Ensure your Data is AI-Ready

Introduce Data Observability

Manage AI Risk

Focus on Sustainability

Key Factors That Determine Your AI Readiness

◆ Have you defined and aligned your AI goals with the business objectives?

◆ Have you assessed your data quality, availability, and governance?

◆ Have you evaluated your current technology stack for AI readiness?

◆ Have you examined leadership vision, workforce skills, and change management capabilities?

◆ Have you identified key processes that can benefit from AI?

◆ Have you identified high-impact AI use cases?

◆ Do you have a detailed AI-first implementation roadmap?
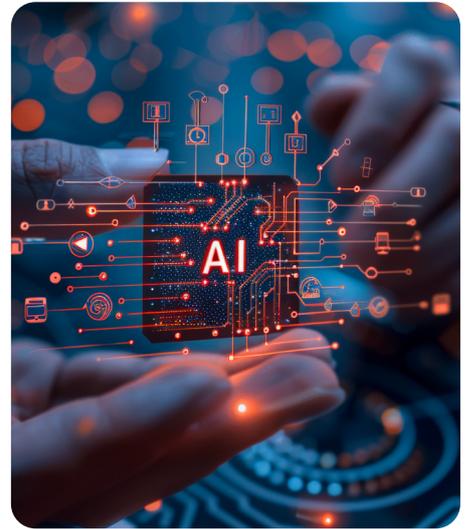

Partnering with Korcomptenz gives you a strategic edge in harnessing the power of data to drive innovation and success. By adding an AI readiness assessment to your strategy, you'll be even better positioned to stay competitive and ahead of the curve in a fast-changing market.
