

How we helped a leading foam manufacturer implement **Microsoft Dynamics 365 Finance & Operations** in just **four months** while driving a **\$250k savings**

Key Outcomes

\$250,000

saved through streamlined operations

In 4 months

Completed seamless transition

Over 20

specialized markets served

Industry

Leading player in closed cell foam manufacturing

Solution

Enhanced efficiency through ERP system integration.

Technology Used

Leveraged Microsoft Dynamics 365 Finance & Operations.

About the Client

Our client fabricates foam, film, textile, and adhesive components, serving **over 20 specialized markets**, including automotive, medical, military, and general manufacturing. Their commitment to quality and innovation makes them a leader in their field, providing tailored solutions that meet the diverse needs of their extensive client base.

Challenges

The company faced significant challenges due to **limited process coverage and excessive manual tasks**. Their existing ERP system was incompatible with the parent company, leading to **inefficiencies and increased operational costs**. Manual financial reporting processes were time-consuming and prone to errors, hindering timely decision-making and strategic planning.

The Solution

Korcomptenz facilitated a seamless transition from NetSuite to a new system across the client's US, Mexico, and China locations within an accelerated timeline of four months. The implementation encompassed Manufacturing, Planning, Sales, Purchases, and Finance functionalities.

Korcomptenz developed a robust risk mitigation strategy, addressing potential project pitfalls in a detailed project plan clearly calling out challenges faced by companies on a rapid implementation path. Comprehensive training sessions were conducted to ensure users were well-acquainted with the new system. Proactive and meticulous data preparation, cleansing, and migration were carried out to maintain data integrity throughout the transition.

Comprehensive risk mitigation plan to address potential project challenges.

Detailed training sessions to ensure users were proficient with the new system.

Successful data migration and staggered go-live across US, Mexico, and China locations

The Benefits

The new system allowed the client to avoid the costs associated with renewing its existing ERP, resulting in **\$250K savings**. The digitization of manual processes **enhanced efficiency** across Planning, Approvals, and financial consolidation. This not only streamlined operations but also **improved data accuracy and decision-making capabilities**, positioning the company for future growth.

The Client Testimonial

"Korcomptenz's implementation strategy tailored to meet our objectives and schedule were crucial for our seamless transition. Their meticulous approach and risk mitigation ensured our operations continued smoothly, without disruptions. We were impressed with their dedication to maintaining data integrity and their ability to meet our accelerated timeline."
